

HEAT EXCHANGERS

Handle the Heat

Silver Linings Systems' Heat Exchangers use chilled water to create air cooling, providing a comfortable temperature for both employees and IT equipment. Versatile and efficient, heat exchangers are a perfect choice for a wide range of environments.

**Mount
anywhere**

Our variety of mounting kits let you install anywhere there's plumbing.

**Keep operating
costs low**

Minimize energy costs with fans that run only when needed.

**Defend against
overheating**

Extend the life of expensive hardware with versatile, go-anywhere cooling.

**Ice out
hot spots**

Targeted cooling takes the pressure off your building's A/C system.

Tackle any high-heat environment with intelligently efficient cooling.

Industrial Use

Cool individual rooms or trouble spots in your work space

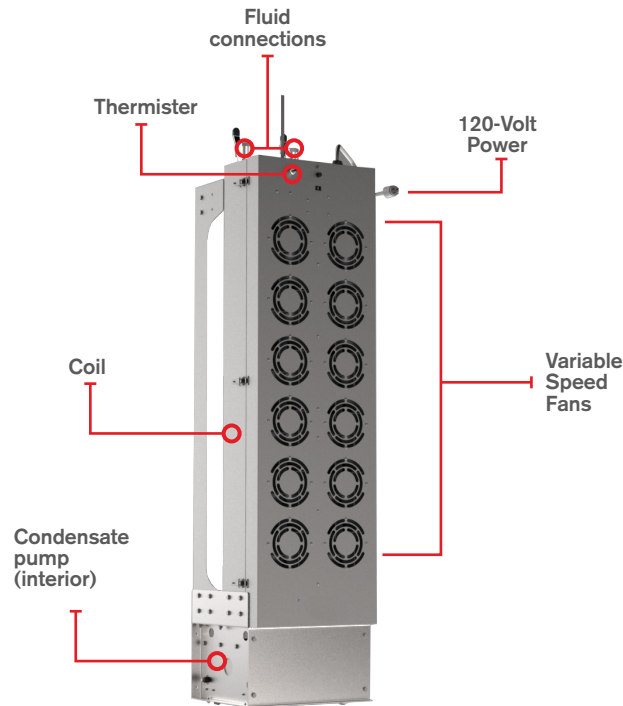

Server Rooms

Maintain a constant temperature even in high-density rooms

Offices

Manage hot spots in expansive facilities with minimal noise

Component Overview

Mounting Options

- Horizontal for mounting from ceiling
- Base for stand-alone placement
- Vertical for column mounting
- Duct extension for cooling an adjacent room
- Connect to existing facility plumbing

Your Heat Exchanger may need a Fluid Cooler and Chiller to maximize cooling power.

Not seeing what you need? A Silver Linings expert can create a custom solution for you.

Cooling Capacity	39,000 BTU/hr (3.25 RT)
Input Power	120 V (5.4 amps)
Fans	(12) 6" variable speed AC panel fans
Operating Conditions	40°-104°F (indoor use only)
Sound Performance	≤ 70dBa at 1m

*Specs for 12-fan configuration
